

**OCCUPATIONAL HEALTH
PROGRAMS**

**Pre-placement Medical Examination
Welcome**

Welcome to your pre-placement medical examination for a position with the County of Los Angeles!

You have been scheduled for an appointment with a clinic that is a contractor for the County. The clinic will provide your medical information to Occupational Health Programs(OHP) for the final assessment.

Doctors from OHP will review your medical information and make the final determination based on job related standards and business necessity. You may be requested to provide additional information and/or medical records for this review. You may be asked to return to your personal physician for further assessment of your medical condition.

It is very important that you provide an accurate and complete medical history on the medical questionnaire and in the clinic interview. The doctors need an accurate medical history in order to determine if you can work safely.

We will send you a letter with the results of your examination in about three weeks. After three weeks, you may call to check on the status of your medical examination at the following number: OHP Medical Exam Status Hotline at 213-738-2187.
