1112	Data Analysis & Management Internship	Assist with data analysis and management of several databases, assist with synthesizing results	Be in the process of receiving Master in Public Health degree. Have taken public health courses focused on: Research and evaluation methodology, Health program planning, Health theory, Social marketing, Health education and health promotion	Self starter. Requires minimal supervision on projects. Ability to apply public health theory in program planning, evaluation, and material development. Ability to work with diverse stakeholders. Strong writing skills. Strong communication skills. Ability to manage data, ability to interpret results, ability to summarize evaluation findings to summary reports. Pays attention to detail. Able to conduct lit review. Ability to apply core public health theories for program planning and evaluation purposes. Ability to use theory to guide development of social marketing/health education materials.	Public Health 3530 Wilshire Blvd, Suite 800, Los Angeles, CA 90010
1114	Area Agency on Aging (AAA) Newsletter	To gain experience through the Los Angeles County AAA by participating in the development, release, and implementation of the first and subsequent AAA Newsletter(s). The purpose of the newsletter is to provide information on AAA services and to highlight some of the programs and their successes. More importantly, the newsletter will allow the AAA to share information with community partners that provide essential services for older adults and adults with disabilities in Los Angeles County. Area Agencies on Aging (AAA) were established through the Older Americans Act (OAA) of 1965 to help older adults find employment, live as independently as possible in the community, promote healthy aging and community involvement, and assist family members in their vital roles as caregivers. The Los Angeles County AAA is a State-designated agency established in 1975 and is responsible for developing, coordinating, and implementing programs that promote the health, dignity, and well-being of Los Angeles County's residents. The Los Angeles County AAA is under the umbrella of the CSS Department and is part of the Aging and Adult Services Branch. The AAA and a network of public and private community-based agencies provide a broad range of services to older adults.	Students must have classes or major in Public Administration, Public Policy, Communications, English, Gerontology, Sociology, or other related fields.	Intern must have the ability to review information on specific forms and reports and make recommendations on the completeness and accuracy of these. Experience in Microsoft Office Software is desired. Good writing skills. Intern with ability to determine useful community resources and opportunities that support the project(s) is a plus.	Workforce Development, Aging and Community Services 3333 Wilshire Boulevard, Suite 400, Los Angeles, CA 90010
1116	Premature Delivery Rate among African American in LAC	The statement of work, or action plan is developed and written by the intern, since the internship is self-directed and when the intern is passionate about a topic, the outcomes are better. Among actions of responsibility for a: 1. Literature review 2. Review LAC data available on the topic 3. Research on best practices conducted on the topic by other organizations, counties, state 4. Assist in developing a public health intervention- intern to decide: patient information, website content, partner communication 5. Abstract to be written and submitted for presentation to a professional organization, highlighting the findings.	Student must be currently enrolled in a quarter/semester partnered colleges/universities.	Must have the ability to think, understand and act on information obtained in a way that is both effective and responsible. Ability to exchange information both orally and written in a clear and precise way. Must have a basic understanding of research analysis.	Public Health 695 Vermont Ave., Los Angeles, CA 90005, 14th floor and in the field as necessary.
1117	Cardiovascular and School Health Intern	Conduct and/or support assessment activities to inform program planning, implementation, and strategy development related to joint/shared use and/or physical activity events; conducting field work; and researching and developing work programs for grant funding sources. The intern will have the opportunity to gain an understanding of the community planning process while interacting directly with various community members; stakeholders from local, state, and federal agencies; and also develop an understanding of the Los Angeles County General Plan and Zoning Code.	Graduate student (Masters in Public Health or Public Policy preferred)	strong writing and statistical analysis capabilities; knowledge of data collection methods; experience with program evaluation, data collection and analysis; proficient in Microsoft Office suite and statistical analysis software; excellent verbal and written communication skills.	Public Health 3333 Wilshire Blvd, Suite 800, Los Angeles, CA 90010
1119	Violent Death Reporting System Data Abstraction	The intern will be working on the Violent Death Reporting System (VDRS). VDRS is designed to compile information from multiple sources to gain a complete picture of violent deaths (homicides, suicides, etc.) in Los Angeles County. The intern's duties will include reading coroner's case reports of violent deaths and abstracting information from those reports for entry into the VDRS database. This is not a straightforward data entry job; the coroner's narrative must be carefully read and interpreted to ensure the correct circumstances surrounding each death are entered into the system. The intern will also participate in VDRS data abstraction meetings to discuss data entry procedures and to talk through difficult cases. Depending on the intern's interests, there is also the potential for developing research projects using VDRS data.	Intern should be majoring in a social science such as public health, criminology, sociology, psychology, etc.	Intern must be reliable and detail-oriented and be willing to read coroner's reports of violent deaths. Previous data entry experience and interest in violence prevention and/or mental health is preferred.	Public Health 695 S Vermont, Los Angeles, CA 90005
1120	East San Gabriel Valley Area Plan	The Academic Internship consists of conducting research, documentation, and preparation of notices and other documents; assisting in the preparation of community outreach events; conducting field work; and researching and developing work programs for grant funding sources. The intern will have the opportunity to gain an understanding of the community planning process while interacting directly with various community members; stakeholders from local, state, and federal agencies; and also develop an understanding of the Los Angeles County General Plan and Zoning Code.	Undergraduate or Graduate student who is enrolled in or has previously taken Land Use/Community Planning classes or any related classes.	Knowledge and ability to research local, state, and federal regulations pertaining to zoning and land use policies. An understanding of maps is desired. Proficient in basic computer programs such as word, excel, etc. The ability to effectively work and deal with people on a routine basis is desired. The intern must have strong organizational skills; possess the ability to effectively communicate and quickly grasp information; and the ability to readily prioritize tasks and effectively manage project assignments. Fluent Spanish language skills desired.	Regional Planning 320 W. Temple Street, 13th Floor, Los Angeles, CA 90012
1121	Violent Death Reporting System Data Abstraction	The intern will be working on the Violent Death Reporting System (VDRS). VDRS is designed to compile information from multiple sources to gain a complete picture of violent deaths (homicides, suicides, etc.) in Los Angeles County. The intern's duties will include reading coroner's case reports of violent deaths and abstracting information from those reports for entry into the VDRS database. This is not a straightforward data entry job; the coroner's narrative must be carefully read and interpreted to ensure the correct circumstances surrounding each death are entered into the system. The intern will also participate in VDRS data abstraction meetings to discuss data entry procedures and to talk through difficult cases. Depending on the intern's interests, there is also the potential for developing research projects using VDRS data.	Intern should be majoring in a social science such as public health, criminology, sociology, psychology, etc.	Intern must be reliable and detail-oriented and be willing to read coroner's reports of violent deaths. Previous data entry experience and interest in violence prevention and/or mental health is preferred.	Public Health 695 S Vermont, Los Angeles, CA 90005
1122	East San Gabriel Valley Area Plan	The Academic Internship consists of conducting research, documentation, and preparation of notices and other documents; assisting in the preparation of community outreach events; conducting field work; and researching and developing work programs for grant funding sources. The intern will have the opportunity to gain an understanding of the community planning process while interacting directly with various community members; stakeholders from local, state, and federal agencies; and also develop an understanding of the Los Angeles County General Plan and Zoning Code.	Undergraduate or Graduate student who is enrolled in or has previously taken Land Use/Community Planning classes or any related classes.	Knowledge and ability to research local, state, and federal regulations pertaining to zoning and land use policies. An understanding of maps is desired. Proficient in basic computer programs such as word, excel, etc. The ability to effectively work and deal with people on a routine basis is desired. The intern must have strong organizational skills; possess the ability to effectively communicate and quickly grasp information; and the ability to readily prioritize tasks and effectively manage project assignments. Fluent Spanish language skills desired.	Department of Regional Planning 320 W. Temple Street, 13th Floor, Los Angeles, CA 90012
1124	Trauma Prevention Initiative – Violence Prevention Community Engagement and Research/Evaluation	The Intern will be working on the Countywide Trauma Prevention Initiative. The Los Angeles County Department of Public Health (DPH) under the auspices of the Trauma Prevention Initiative (TPI), seeks to reduce the disproportionately high incidence of trauma visits, injuries and deaths in communities of interest throughout the county, prioritizing the high incidence of violence-related trauma visits, injuries and deaths in South LA. DPH intends to achieve this aim, in part, by working with community agencies to increase access to targeted services and strengthening linkages between community members, community resources and clinical services through hospital based violence intervention, community based intervention/safe passages, and building capacity within the communities to address violence using a public health approach. The intern will be a critical support staff to the Initiative's Coordinator and should be an individual who is detail-oriented with strong communication and administrative skills. Duties include, but are not restricted to: • Work directly with the Initiative's Coordinator and Lead Evaluator to advance the many identified strategies and efforts of the initiative. • Attend community meetings to learn about the program, interface with stakeholders, take meeting minutes and assist with coordinating efforts of different stakeholders as it pertains to violence prevention. • Participate in strategic planning meetings, assist in preparing meeting materials and presentations, and take meeting minutes. • When possible, attend evening and weekend community events in the communities of interest, assisting with research and evaluation as well as program development and implementation. • Assist Coordinator/Evaluator with TPI research projects, including working with trauma centers and community partners to plan and conduct research and working with TPI staff and partners to develop and evaluate projects. • Assist Evaluator lead with collection and analysis of initiative data. • Assist with literature reviews, identification of best practices and writing evaluation reports. • Depending on the intern's interests, there is also the potential for developing research projects associated with violence prevention and intervention.	Intern should be majoring in a social science such as public health, sociology, psychology, etc.	Intern must be reliable and detail-oriented and be willing to work within South Los Angeles communities including the communities of Westmont/West Athens and Willowbrook. Previous community related experience and interest in violence prevention/intervention and/or mental health is preferred.	Public Health Office location: 695 S Vermont, Los Angeles, CA 90005 Community Locations: Within various neighborhoods in South Los Angeles.
1127	Assistant Project Coordinator Intern-GRAD	The TB Program Education and Evaluation Unit, seeks an Assistant Project Coordinator Intern to assist with planning and collaboration efforts. Duties for the intern may include one or more of the following: assisting in building a TB coalition, coordinating TB First Friday continuing medical education (CME) workshops/conferences, planning World TB Day, editing health education material, developing fact sheets and drafting annual education and training reports based on resulting data. More specifically, under the leadership of the Sr. Health Educator, the intern will help assist in planning and executing World TB Day 2017 and TB First Friday conferences and compiling data sources for TB Control Program reporting purposes.	Must currently be a student in a Master's degree accredited program of study with specialization in Public Health Education or Community Health Education.	Interested graduate students should possess: excellent written and oral communication skills; strong organizational ability; great attention to detail; skill to work both independently and in team settings; ability to conduct and implement research on evidence-based practices; and intermediate to advanced skills in Microsoft Office software applications (Word, Excel, PowerPoint, Publisher and Access). Ability to interpret quantitative statistical analysis and develop evaluation reports. At least one program planning; and at least one health behavior theory or communication course preferred.	Department of Public Health - Communicable Disease Control and Prevention Division - Tuberculosis Control Program 2615 S. Grand Ave., Los Angeles, CA 90007
1128	MCAH Research, Evaluation and Planning Internship	The County of Los Angeles Department of Public Health, Maternal, Child, and Adolescent Health Program is seeking highly motivated student interns to provide support for various projects related to research, evaluation, planning and/or policy development. The purpose of the internship is for the intern(s) to gain exposure and experience in MCAH related issues. Depending on the student's interest and background, major assignments include but are not limited to: • Support the implementation of three survey projects; specific duties include reviewing the survey tool, conducting phone interviews, and tracking project progress. • Work with MCAH staff in maintaining and conducting further analyses on various MCAH issues • Assist with MCAH research data dissemination to MCAH stakeholders and community partners • Assist with MCAH program evaluation, and communicate findings for program/project improvement. • Assist with conducting focus groups to solicit feedback to inform project design and implementation; specific duties include outreach and recruitment of focus group participants, collecting and analyzing focus group feedback and making recommendations to project implementation. • Assist with conducting comprehensive literature review on MCAH related topics. • Assist MCAH staff in report generation and compilation. Support MCAH Program staff in maintaining and designing MCAH Program website and MCAH Data Center; assist with periodic updates of Tracking Preconception and Interception Health Indicators in LAC website data. Assist with MCAH staff in designing and developing health education and program materials incorporating evidence-based health literacy practices. Depending on the intern's skill, experience and interest, the student intern will be encouraged to develop his/her own analysis topics and carry out the project independently with assistance from MCAH staff based on available data.	College students interested in a career in public health or graduate students in public health related fields, Graduate or Doctorate	Preferred but not required: Experience conducting telephone interviews; knowledge of MS Access and SAS; Basic knowledge of Epidemiology and research design. Critical Thinking Skills: Generating or assessing solutions; Identifying or critiquing health information and materials; generating program ideas for hard-to-reach populations. Oral and Written Communication Skills: Proficiency in oral and written communication skills. Spanish preferred but not required.	Los Angeles County Dept. Public Health - Maternal, Child & Adolescent Health Programs (MCAH) 660 South Commonwealth Ave., Suite 800, Los Angeles, CA 90005

Excellent customer service and interpersonal skills, excellent oral articulation and presentation skills, and advanced written communication skills.	Workforce Development, Aging and Community Services (WDACS) 3175 W. Sixth St., Room 404, Los Angeles, CA 90020
1142	Produce Quality Internship	Assists Agricultural Weights and Measures Inspectors with inspections of agricultural products for compliance with State laws and regulations pertaining to produce quality and plant quarantine. Travels with and assists various inspectors complete routine assignments. During the month of June, will be assigned to intern in the Metro District Office and during the month of July, will be assigned to intern in the Produce Quality Group on a county wide basis.	Must have junior, senior, or graduate level status at a partnered college/university.	N/A	Agricultural Comm/Weights and Measures ACWM Headquarters, 11012 Garfield Ave, South Gate, CA 90280. Various Internship locations throughout the County of Los Angeles.
1145	Parks After Dark (PAD) Strategy - Evaluation, community engagement, program development.	Parks After Dark (PAD) keeps county parks open during summer weekend evenings in disadvantaged communities with high rates of crime and obesity. PAD take place at the Los Angeles County WDACS/Community and Senior Centers has sites throughout the County. Each center is unique and reflects the multi-ethnic communities served. The centers provide both direct services to community residents, a broad range of services to older adults and function as "hubs of human services" for the members of community based and governmental organizations that operate from the centers. A multi-faceted needs assessment must be conducted for each Center in the County of Los Angeles under the purview of WDACS in order to ensure that they continue to provide relevant community service. This needs assessment will answer the "who, what, and why" around which services will be continued or offered or needed in order to establish new services. The central areas of interest should include, but are not limited to identifying: a) target populations b) the types and extent of existing and potential needs of local residents including older adults in LA County c) barriers and challenges experienced by local residents and elderly in accessing services in LA County d) the services and resources existing within the local area surrounding the Center that are available for addressing those needs e) identify priority of services Tasks and duties may include: Research information by identifying, locating and extracting relevant data and information (e.g., by reading, collecting, downloading, interviewing from various sources (e.g., internet search engines, library materials, government and technical reports, knowledge and technical skills) in order to obtain sufficient, valid, and reliable data for analysis and decision making purposes. Compile information by grouping and categorizing the information (e.g., in tables, spreadsheets, data files) in meaningful ways in order to facilitate analysis using qualitative and/or quantitative analytical methods. In order to understand and draw fact-based conclusions, often from large amounts of information; identifies issues and problems requiring additional research and study and takes appropriate action to ensure sound study results. Develops and/or recommends the development of policies, programs, or procedures to address problems or improve operations by applying the results of research and analysis of pertinent information in order to ensure the highest likelihood of success. Prepares a variety of documents (e.g., reports, business correspondence, memoranda), adapting formats suitable to the purpose and using relevant software programs (e.g., word processing, desktop publishing, presentation) in order to effectively communicate information to various audiences (e.g., departmental personnel, members of the public, governing boards). Interacts with a variety of individuals (e.g., vendors, managers, representatives of external agencies/organizations) when participating in meetings, making presentations, providing advice and/or consultation services, etc., in order to communicate information, share ideas, present recommended solutions, gain agreement, and coordinate activities. Monitor program face, gathering and analyzing relevant information in order to ensure that programs are proceeding as intended. Evaluates program effectiveness by comparing outcomes to goals in order to determine whether to continue or modify the program. Performs various administrative duties (e.g., creating and maintaining files, formatting standard documents; reviewing, processing, and routing documents) by appropriately applying Federal and State laws, County and local ordinances, and departmental policies and procedures in order to ensure all work done complies with established guidelines and requirements.	Intern should be a graduate-level student majoring in a social science such as public health, sociology, psychology, etc. Intern must work closely with DPH's PAD lead and other staff with high rates of economic hardship and violence. While Parks After Dark is safe, and law enforcement are present, applicants must be comfortable working in parks in high crime communities during the evening. Parks After Dark provides opportunities for a wide range of experience, education, and skills. These include health education, community engagement, working with different kinds of stakeholders including youth and adult community members, community organizations, and government agencies, conducting quantitative and qualitative research, and developing reports and presentations. Knowledge of and interest in community engagement, public health, violence prevention and/or social determinants of health is preferred. Applicants must be organized and detail oriented.	Analyzing different types of data, including survey data, health data, and crime data; interview and focus group data, and summarizing data for different audiences. Prioritizing work among a wide variety of responsibilities and tasks. Ability to diplomatically and professionally engage community members and county department and community based organization staff, and reconcile disparate points of view. Experience developing or implementing surveys, working with community members to conduct research, statistical analysis, GIS mapping, theming qualitative data, or data entry. Experience using software like Microsoft Excel, Access, PowerPoint, and ArcMap. Intern must have strong oral and written communication skills and be able to communicate effectively with program staff and community partners. Intern should be versed in the use of Microsoft Office Suite, including Word, Excel, PowerPoint, etc.). Ability to concisely summarize research literature and data analyses.	Department of Public Health Office location: 695 S Vermont, Los Angeles, CA 90005 Community Locations: Within various neighborhoods throughout Los Angeles County.
1149	Community and Senior Centers, Needs Assessment	To gain experience through the County of Los Angeles, Workforce Development, Aging and Community Services, (WDACS), Community and Senior Centers Division by participating in the development of a needs assessment for one of 14 Centers dependent on interns proximity to the nearest Center. The Los Angeles County WDACS/Community and Senior Centers has sites throughout the County. Each center is unique and reflects the multi-ethnic communities served. The centers provide both direct services to community residents, a broad range of services to older adults and function as "hubs of human services" for the members of community based and governmental organizations that operate from the centers. A multi-faceted needs assessment must be conducted for each Center in the County of Los Angeles under the purview of WDACS in order to ensure that they continue to provide relevant community service. This needs assessment will answer the "who, what, and why" around which services will be continued or offered or needed in order to establish new services. The central areas of interest should include, but are not limited to identifying: a) target populations b) the types and extent of existing and potential needs of local residents including older adults in LA County c) barriers and challenges experienced by local residents and elderly in accessing services in LA County d) the services and resources existing within the local area surrounding the Center that are available for addressing those needs e) identify priority of services Tasks and duties may include: Research information by identifying, locating and extracting relevant data and information (e.g., by reading, collecting, downloading, interviewing from various sources (e.g., internet search engines, library materials, government and technical reports, knowledge and technical skills) in order to obtain sufficient, valid, and reliable data for analysis and decision making purposes. Compile information by grouping and categorizing the information (e.g., in tables, spreadsheets, data files) in meaningful ways in order to facilitate analysis using qualitative and/or quantitative analytical methods. In order to understand and draw fact-based conclusions, often from large amounts of information; identifies issues and problems requiring additional research and study and takes appropriate action to ensure sound study results. Develops and/or recommends the development of policies, programs, or procedures to address problems or improve operations by applying the results of research and analysis of pertinent information in order to ensure the highest likelihood of success. Prepares a variety of documents (e.g., reports, business correspondence, memoranda), adapting formats suitable to the purpose and using relevant software programs (e.g., word processing, desktop publishing, presentation) in order to effectively communicate information to various audiences (e.g., departmental personnel, members of the public, governing boards). Interacts with a variety of individuals (e.g., vendors, managers, representatives of external agencies/organizations) when participating in meetings, making presentations, providing advice and/or consultation services, etc., in order to communicate information, share ideas, present recommended solutions, gain agreement, and coordinate activities. Monitor program face, gathering and analyzing relevant information in order to ensure that programs are proceeding as intended. Evaluates program effectiveness by comparing outcomes to goals in order to determine whether to continue or modify the program. Performs various administrative duties (e.g., creating and maintaining files, formatting standard documents; reviewing, processing, and routing documents) by appropriately applying Federal and State laws, County and local ordinances, and departmental policies and procedures in order to ensure all work done complies with established guidelines and requirements.	Students must have classes or major in Public Administration, Gerontology, Sociology, or other related Social Sciences.	Intern must have the ability to review information on specific forms and reports and make recommendations on the completeness and accuracy of these. Experience in Microsoft Office Software is desired. Good writing skills and public speaking skills. Intern with ability to determine useful community resources and opportunities that support the project(s) is a plus.	Workforce Development, Aging and Community Services (WDACS) Any one of the fourteen Centers under purview of WDACS

Interns will be working with WGI staff, the WGI Governing Council, elected officials, County staff, consultants and community leaders to advance equality for women. Interns must show a genuine desire to help shape the future of the lives of women and girls in the County. The internship goal is to find quality candidates that are interested in conducting and analyzing research to help determine policies and programs that will improve the lives of women and girls. Some of the tasks related to research includes, but not limited to: 1) Compile qualitative and quantitative data 2) Assist in data collection, merging of datasets and spreadsheet preparation 3) Assist in the generation of reports 4) Assist in oral presentation of the findings	Classes of major in Communications, Public Administration, Sociology, Women's Studies, or other related Gender studies.	• Experience in Microsoft Office software is required. • Proficient writing and analytical skills are highly desired. • Research experience and public speaking skills also desired.	Chief Executive Office Kenneth Hahn Hall of Administration 222 S. Hill Street 5th Floor Los Angeles, CA 90012
1166	Substance Abuse Disorders Treatment Training	Antelope Valley Rehabilitation Centers (AVRC) is a Los Angeles County residential treatment facility for adults struggling with addiction including individuals with both addiction and mental health disorders. AVRC is an ideal training site for substance abuse counselor trainees to acquire supervised hours towards certification. We also offer internship training for students in the healing arts (social workers, marriage & family therapists, and psychologists).	Need to be a registered substance abuse counselor who is wanting to collect supervised hours towards their certification (BA degree not mandatory) or have at least a MA in the healing arts and ready to collect hours towards licensure for a licensed practitioner of the healing arts (LPHA). Required education level is not applicable unless they are working towards licensure as a LPHA. Trainees in the Substance Abuse field need to be registered with one of the National Commission for Certifying Agencies accredited organizations recognized by the Department of Health Care Services.		Dept. of Public Health Substance Abuse Prevention & Control, Antelope Valley Rehabilitation Centers 36500 Arrastrae Canyon Road, Acton CA 91510
1167	Electronic Bulletin Board (EBB)- Signage Solution	Implement and manage Digital Signage projects in an enterprise level organization. The level of experience gained during this project can be transferred to other Information Technology Projects. Some of the skills sets that will be learned during this project are: Systems administration, Servers administration, Panel configuration, vendor management, site assessment and Magic info server configuration And Content deployment	Fields related to Engineering, Computer Sciences or Information Technology	Windows servers administration, or computer science related course, or Information Technology Related Classes	Public Social Services 12860 Crossroads Parkway South City of Industry
1168	Auditor Controller – Data Science and Analytics	The Auditor-Controller has access to a wealth of financial and payroll data that has tremendous analytical value. This project uses data science to analyze and model the data in a data lake using a variety of analytical tools (Power BI, SAS, Tableau and HADOOP) to provide predictive insight into the financial opportunities and cost savings the county could realize. The project goals would be to provide dashboards that allow executive managers to make critical decisions of the County. The student (s) assigned to this project would benefit from working with a team of business users and IT experts. The students would work with subject matter experts to gather user requirements, mockup design proposals, present proposals to key stakeholders, and work with subject matter experts on the project.	Fields related to Engineering, Computer Sciences or Information Technology	Data Analysis and Design Data Science methodologies	Auditor Controller 1000 South Fremont Avenue Alhambra, CA
1169	Auditor Controller – Website – Re-Design – multiple	The Auditor-Controller could benefit from a redesign of its websites to look modern and be responsive to various devices (including mobile). The County's Employee Portal (myalacounty.gov) is the main hub for over 100,000 employees. The student (s) assigned to this project would benefit from working with a team of business users and IT experts. The students would get exposed to requirement gathering, analysis, design, development, testing and deployment to the County end users and stakeholders.	Fields related to Engineering, Computer Sciences or Information Technology	UI design Data Analysis methodologies	Auditor Controller 1000 South Fremont Avenue Alhambra, CA
1170	Auditor Controller – Mobile Website – Re-Design	The Mileage Authorization and Reimbursement System (MARS) is used by County employees to reimburse mileage and parking expenses. The County could benefit from the development of a MARS mobile application allowing employees to file their claims in real time and capture receipts using their personal devices. The student(s) assigned to this project would benefit from working with a team of business and IT experts to develop a mobile application with enhanced user interface and responsive design. The students would be expected to gather user requirements, mockup design proposals, present proposals to key stakeholders, and work with subject matter experts on the redesign of the mobile applications.	Fields related to Engineering, Computer Sciences or Information Technology	Mobile design Website UI design	Auditor Controller 1000 South Fremont Avenue Alhambra, CA
1171	System Registration Process	The Probation Department currently manages access to over 60 criminal justice internal and external applications. Timely access to criminal justice systems is fundamental to a Probation Officer's function and many times plays a critical role in ensuring public safety. The current process for an employee to request and get approved for access to criminal justice systems uses a web based tool to complete forms that are printed and signed. The forms are then delivered manually up the chain of command for review and approval. Once approved, the forms are delivered to the Systems Registration Unit for processing. Create an automated workflow system with electronic approval capabilities to facilitate system access requests. User will access the system either via the desktop and/or mobile devices (e.g., smartphone or tablet) to submit system access request. Request shall be routed to appropriate supervisors and managers for approval. All access requests shall be tracked in a database allowing users to check the status of their requests and send reminders to approvers as needed. Reports shall be available to track all user access granted. Students working on this project will: Develop project scope and strategy resulting in a project charter Complete requirements gathering Develop business process modeling Complete system architecture design Complete coding Complete testing Complete technology transfer to include requirements for system maintenance and support	Fields related to Engineering, Computer Sciences or Information Technology	The ideal participants should be versed in software and tools that include, but not limited to: • Xamarin • C Sharp • .NET • Business Process Automation (BPM) or workflow solutions	Probation Department Headquarters 9150 Imperial Highway Downey, CA 90242

Project #	Project Title	Project Description	Possible Major	Critical Skills	Location
1172	Probation Facilities Inspection Application	Probation Department managers are encouraged to visit the Department's juvenile detention facilities and report their observations. Currently, the managers complete and submit their reports manually which is time consuming and cumbersome. Many times, the managers do not receive any information about how their concerns were addressed, or how their feedback was received. The proposed project will develop a system for recording observations at a site visit using a smartphone and tablet app, a database to record the observations, create basic reports, and provide ad-hoc reporting capability. The system shall have the flexibility to change the site visit observation items (questions) to adapt to future requirements. The app would presumably include the ability to take photos and file them with the reports. The system shall document and track the resolution of any issues presented during the visits and would provide managers access to feedback or progress made in the areas of concern. The system shall adhere to Departmental security and confidentiality standards. Students working on this project will: Develop project scope and strategy resulting in a project charter Complete requirements gathering Develop business process modeling Complete system architecture design Complete coding Complete testing Complete technology transfer to include requirements for system maintenance and support	Fields related to Engineering, Computer Sciences or Information Technology	• Xamarin • C Sharp • .NET • Business Process Automation (BPM) or workflow solutions	Probation Department Headquarters Information Systems Bureau 9150 Imperial Highway Downey, CA 90242
1173	Bureau of Victims Services/Direct Services App/Site	The Los Angeles District Attorney Bureau of Victim Services provides comprehensive victim services in Los Angeles County to help victims become survivors. This assistance is given independently of legal residency or citizenship. Services include crisis intervention; emergency assistance; counseling referrals; court escort and orientation; restitution assistance; returning of property; assistance with employers; and case status notification. The department serves victims with special needs (e.g., children, the elderly, persons with disabilities, etc.) and provides support in a variety of languages. The Bureau would like to enhance our level of service provision through the use of technology to better reach and connect with and support victims of crime in LA County. Although the Bureau posts information on its website, http://da.lacounty.gov , we would like to provide a simplified and easily accessible method of informing victims of crime with locations where service can be provided. Additionally, we would like to direct victims to external services that would be of immediate assistance to a crime victim. A mobile website and/or an app could expand the departments reach, but it can also allow Victims Services Representatives to better focus on service delivery through the provision of timely and geographically appropriate information. We believe that a mobile website or an app could provide innovative solutions based on location of services and other mobile features that the regular website cannot. It is of particular interest that victims would be directed to services in a location near them. Our project envisions students working closely with subject matter experts to define some of these innovative services that can be offered through mobile technology and to devise the mobile app and/or mobile website to deliver such services.	Fields related to Engineering, Computer Sciences or Information Technology	Mobile application development, web design and development, business process analysis	District Attorney's Office Remote, as well as Bureau of Victims Services HQ in El Monte
1174	Public Records Acts (PRA) Request website	Develop a website for the public to request public records from the Department of Regional Planning. This is a simple request application. The project entails creating a project plan, gathering business requirements, designing the system, developing the system, testing, training, developing documentation and implementing the website.	Fields related to Engineering, Computer Sciences or Information Technology	WordPress	Flexible. Students can meet offline. Then we can have weekly, biweekly meetings. We can also do Skype meetings.
1175	Conditional Use Permit Deposit Account Balances Web Application	Develop an application that displays Conditional Use Permits (CUP) account balances for draw down accounts. The Department of Regional Planning has a permitting system database. Students would use PHP code to connect to the permitting system's SQL Server database, gather the account balance data, then display the results in HTML or JavaScript. CSS would be used to style the results	Fields related to Engineering, Computer Sciences or Information Technology	GIT, PHP, JavaScript, HTML, CSS, SQL, Microsoft Project optional)	Flexible. Students can meet offline. Then we can have weekly, biweekly meetings. We can also do Skype meetings.
1176	Weed Abatement Ownership Annual Notice	Replace existing system with a modern web based application. Annual Notices are sent to parcel owners who have vacant/unimproved property that has overgrown weeds that have been deemed necessary to clear. The customer has several options: self-mediate the situation, request the county clear the property, or nothing. If the customer chooses not to respond, the county will clear the property and bill the owner. If the owner doesn't pay, the money is then forwarded to Treasurer Tax Collector to add outstanding bill to property tax bill. The project will require several modules: 1) External web application that will allow customer to respond online to the Notice; 2) Internal web application to collect and manage all facets of the process. 3) Standard and ad-hoc reporting (Excel data export) 4) Dashboard to display system status.	Fields related to Engineering, Computer Sciences or Information Technology	Knowledgeable: PHP, C#(MVC), MySQL/SQL, ER diagramming, JavaScript/ECMAScript, jQuery, jQuery-UI, bootstrap, Eclipse, XML/XSLT, iSON, virtual machines (VMWare, VirtualBox), Git. Familiar: Vue, React, data virtualization (iBoss), EnterpriseDB/postgres, virtualization: Containers/Kubernetes/Docker, GIS/spatial data: ESRI, Google Maps API). Prefer open-source components with minimal investment in outside technologies. Finalized product must conform to Los Angeles County and Department standards for nomenclature, safe coding, access control (roles or function/action/activity based), and UX.	Agricultural Commissioner/Weights & Measures 12300 Lower Azusa Rd, Arcadia, CA
1177	Electronic Departmental Receipt Tracking	This is new application will be one module of the Budget/Fiscal Cash Ledger application. This application is designed to replace internally (at office locations) book/paper receipts. The application will interface with extracts from the County eCAMS accounting system and other internal systems to determine Invoice and Customer information. The application will provide reporting (standard and ad-hoc [Excel data export]) and status dashboard. This project will be designed to be portable and limit dependency on Department infrastructure.	Fields related to Engineering, Computer Sciences or Information Technology	Knowledgeable: PHP, C#(MVC), MySQL/SQL, ER diagramming, JavaScript/ECMAScript, jQuery, jQuery-UI, bootstrap, Eclipse, XML/XSLT, iSON, virtual machines (VMWare, VirtualBox), Git. Prefer open-source components with minimal investment in outside technologies. Finalized product must conform to Los Angeles County and Department standards for nomenclature, safe coding, access control (roles or function/action/activity based), and UX.	Agricultural Commissioner/Weights & Measures 12300 Lower Azusa Rd, Arcadia, CA
1178	Inventory Management	Replace existing system with a modern web based application. The new application will follow each inventoried item from initial receipt of device to end of life disposal. The application must track each item for: assignment into and out of inventory, annual inventory, image of the device, location of the device. The application will provide reporting (standard and ad-hoc [Excel data export]) and status dashboard. This project will be designed to be portable and limit dependency on Department infrastructure.	Fields related to Engineering, Computer Sciences or Information Technology	Knowledgeable: PHP, C#(MVC), MySQL/SQL, ER diagramming, JavaScript/ECMAScript, jQuery, jQuery-UI, bootstrap, Eclipse, XML/XSLT, iSON, virtual machines (VMWare, VirtualBox), Git. Prefer open-source components with minimal investment in outside technologies. Finalized product must conform to Los Angeles County and Department standards for nomenclature, safe coding, access control (roles or function/action/activity based), and UX.	Agricultural Commissioner/Weights & Measures 12300 Lower Azusa Rd, Arcadia, CA
1179	Housing Portals Redesign	The Commission is seeking to upgrade its existing Tenant and Owner Portals that were originally developed in 2010. The Tenant portal allows Section 8 families to obtain, fill-out, and submit Housing Authority forms to maintain eligibility for housing programs. The Owner portal is available for landlords to view tenants' account information, examine current and historical results of housing inspections, and access all required forms.	Fields related to Engineering, Computer Sciences or Information Technology	Below is a list of technologies that we use. Students should have experience with one of the following programming languages and MS SQL: 2012 or higher. ASP.NET MVC, Bootstrap, and JavaScript Framework, ASP.NET Web API, Entity Framework, Microsoft SQL server, GR, LESS, jQuery, JavaScript, CSS, iSON, AngularJS, HTML, XML, SQL	Housing Authority 700 West Main Street Alhambra CA 91801
1180	APS Mobile	APS Mobile will extend the investigation module of the WDACS Adult Protective Services (APS) case management system. This project calls for native mobile development to empower field workers with a set of tools and resources to protect abuse victims and help save lives. WDACS will provide design specifications, computing infrastructure and technical support. The students will have some design input and will provide mobile application development.	Fields related to Engineering, Computer Sciences or Information Technology	iPhone/iOS, x-code (swift), php	Workforce Development, Aging and Community Services 3175 W. 6th St., Los Angeles, CA 90020
1181	Patient Tracking	Patient Tracking is a component of the BOLDH Project (Brining Our Loved Ones Home). This is a service to dementia patients who wander from home and often become disoriented and lost. This initiative will involve the research, selection and testing of wireless tracking devices, culminating in a recommendation to WDACS. Additionally, there will be backend application development to capture data from the devices in real time and present information to a dashboard. WDACS will provide scope guidance, computing infrastructure, technical support and devices. The students will provide evaluation results, design analysis, integration and software development.	Fields related to Engineering, Computer Sciences or Information Technology	cellular tracking devices, python, php	Workforce Development, Aging and Community Services 3175 W. 6th St., Los Angeles, CA 90021
1182	Remote Home Assist	Remote Home Assist will bring in-home, interactive technology to older adults, helping them maintain independence and well-being. The specific functional objectives involve developing skills for the Amazon Alexa and Actions for the Google Home Assistant to enable end users to interactive with services programs and supply wellness responses. The older adults will answer a set of questions on a scheduled basis to help caregivers make remote assessments. The system will also verbalize and display schedule reminders for congregate meals, doctor appointments, senior center classes and other events. It will enable the users to call for transportation, schedule activities and obtain wellness coaching. WDACS will provide scope guidance, computing infrastructure, technical support and devices. The students will provide design analysis and software development.	Fields related to Engineering, Computer Sciences or Information Technology	Amazon Echo/Show, Google Home Assistant, python, node.js	Workforce Development, Aging and Community Services 3175 W. 6th St., Los Angeles, CA 90022
1183	Customer Service Center Ticketing System	The creation of a Front Counter ticketing system app that is activated in the shelter lobby and initially answers (in artificial intelligence/robot mode) easy/standard questions for customers so that they do not have to needlessly wait in line. If they do need to wait to speak to a live person, a number/ticket is created and is notified via the apps if the number is called.	Fields related to Engineering, Computer Sciences or Information Technology	Computer Science with AI and API with SQL Database programming.	Animal Care and Control Downey or Palmdale/Lancaster area.
1184	Parks Assistant Bot	Integrate Google Dialogflow or Amazon Alexa or Microsoft Cortana with Parks website (WordPress) and future app to find parks with specific amenities/program, reserve a site or register for a program (through 3rd part registration system, with Rest API), answer questions and submit support tickets for public reporting issues at Parks.	Fields related to Engineering, Computer Sciences or Information Technology	Web/serverside development, Google Dialogflow, Amazon Alexa, Microsoft Cortana, Restful API integration with several systems.	Parks & Recreation
1185	Parks Mobile App	Develop Parks App to show parks locations online, register for programs and reserve amenities, push notifications based on geolocation and other functions.	Fields related to Engineering, Computer Sciences or Information Technology	Native iOS/Android Development, Good UI/UX design ability required	Parks & Recreation
